## DETAILED ACTION

### *Election/ Restriction*

Claims 1- 19 and 26-30 are pending in this application..

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

**A/ Group A. Claims 1-12, drawn to a matrix heat transfer composition  
classified in class 524, subclass 439.**

**B/ Group B Claims 13-19, 26,30 drawn to a semiconductor package  
Structure used in computer system, classified in class 257, subclass 762.**

2. The inventions are distinct, each from the other because of the following reasons:

Inventions B and A are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the package can be patentable with a novel heat sink meanwhile The subcombination has separate utility such as: the claimed matrix composition can be used in other applications such as a PTC heater.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the fields of

Art Unit: 2818

search are not co-existent. Therefore, separate examinations would be required and restriction for examination purposes as indicated is proper.

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
